

Exmoor Forward Farming Group – May visit to Halse of Honiton

1. Halse South West started off as Halse of Honiton.
2. They outgrew their premises in the centre of Honiton and moved to their new green field site near Ottery St Mary over Christmas 2016. They opened on the 3rd January 2017 - the new site is three times bigger than their old site.
3. Halse sells a wide range of agricultural machinery - new and second hand machinery as they do part exchange.
4. Each year they send out 10'000 copies of their catalogue showcasing all the machinery they supply. The catalogue has been a major strength to the growth and success of their business.
5. They employ 32 members of staff in total with 5 sales reps covering the South West.
